

As an investigator or study team member experienced with or new to IRBNet, you will want to ensure your training and credentials are up to date in your User Profile, and filed with your local committee as required by their SOPs. The following steps walk you through how to manage your User Profile and meet the project credential requirements of your committee.

- A. Upload and Submit Your Training & Credentials from your User Profile
- B. Link Project Team Credentials into a Project Package
- C. Keep Your Training & Credentials Current

A. Upload and Submit Your Training & Credentials from your User Profile

1. Log into IRBNet and click the [User Profile](#) link in the top right corner of the screen.
2. In the Training & Credentials section (bottom of the page) click the [Add New Record](#) button.

Training & Credentials

IRBNet allows you to track and share your training records, certifications, resumes and other personal credentials. Once added to your profile, your training and credentials can be easily linked to your projects from the Designer, are accessible by your project teams and can be quickly accessed and tracked by the boards that review your projects. Some boards also permit you to directly submit your training and credentials without requiring you to link these records to specific projects.

3. On the Training & Credential Record page, select the appropriate training and credential Document Type, enter the Effective Date of the document (ex. date of training certification) and any other applicable information, and then select the file from your computer by clicking the Browse button.
4. Once the correct file is selected, click 'Attach'.
5. From the User Profile page, click the ["Submit"](#) link (to the right of the new document listing you have just created).

[Show all Versions](#)

Doc ID	Document Type	Description	Cr	Effective Date	Expiration Date	Last Modified	Status	
18606.1	IRB Training - NIH - Protecting Human Research Participants	IRB Training		06/18/2013		06/18/2013 03:41 PM	Not Submitted	

6. Select the organization to which you will be submitting your documentation.
7. Type a message to your committee's administrator and click the Submit button.
8. Repeat steps 1-7 for any other documentation you are required to submit based on your local committee SOPs.
9. If you need to 'update' a record, click the 'pencil' icon to the right, and follow instructions.

In addition to directly submitting documentation to your committee, you may be asked to provide training documentation during the protocol submission process. Having followed the previous steps, you may link any existing training documentation to a project package by following the steps below.

B. Link Project Team Credentials into a Project Package

1. Once the project has been created, ensure all necessary members of the research team have been shared access to the project within IRBNet (see R1 Energizer for a detailed walk-through of this process).
2. Click the Designer button to the left.

Below the list of documents in the package, click the "Link / Un-Link Records" link.

Step 2:
Assemble your document package. In addition to adding project documents to your package, IRBNet also allows you to link your project team's Training & Credentials to your package.

Documents in this Package:

Document Type	Description	Last Modified			
Application Form	IRB Application	05/09/2011 05:08 PM			
Consent Form	Consent Form.doc	05/09/2011 05:07 PM			
Protocol	ASM981 C2439 Protocol.pdf	05/09/2011 05:07 PM			

There are no Training & Credentials records linked to this package. [Link / Un-Link Records](#)

3. On the list of available documents, check the box next to those that should be linked to this package and click Save.

- *Note:* If required documentation is missing, make sure the researcher in question has access to the project and has followed the steps outlined in the first section.

[Show all Versions](#)

Link	User Name	Doc ID	Document Type	Description	Cr	Effective Date	Expiration Date	Status	
<input checked="" type="checkbox"/>	Palazzo, Enrico	22.1	IRB Training - NH - Protecting Human Research Participants	Training Certificate		08/10/2010	08/08/2011	Accepted	
<input checked="" type="checkbox"/>	Researcher, John	21.1	IRB Training - NIH - Protecting Human Research Participants	NIH Training		02/09/2011	02/08/2012	Accepted	

4. Having linked all necessary training documentation, complete the process of submitting this package to the appropriate committee.

On a continuing basis you will need to keep your Training & Credentials documentation up to date within your User Profile. When you have an updated version of an existing document, or need to make changes for any reason, you should walk through the following process to ensure this updated information is available to the appropriate committee.

C. Keep Your Training & Credentials Current

1. Access your User Profile
2. Locate the appropriate document and click the Pencil icon.

Doc ID	Document Type	Description	Cr	Effective Date	Expiration Date	Last Modified	Status	
18606.1	IRB Training - NIH - Protecting Human Research Participants	IRB Training		06/18/2013		06/18/2013 03:41 PM	Pending Review	

3. Edit the Training & Credentials Record page as needed, click the Browse button to locate the updated version of the document.
4. Click the Update button.
5. Having attached the updated document, you now need to submit it to the appropriate committee. Click the Submit link and select the appropriate committee to submit to.

Note: Local SOPs may require that updated training information also be linked to a specific project package during time of Continuing Review or other submission event for that project. In that case, once you have followed the above steps, follow the steps outlined in the second section to link the documentation to a project package.

Points to Remember

Local SOPs may differ as to when and how to submit certain training documentation. Always check with your local committee office to confirm the correct process for managing your Training & Credentials.
